

Zakariae Mrabet

zakariaemrabet48@gmail.com • +212766746532 • <https://github.com/zakarm>

SUMMARY

Experienced AI Engineer with a strong background in integrating advanced AI technologies and developing cutting-edge solutions. Proficient in Python, C, C++, and various frameworks such as FastApi and Django. Demonstrated success in leading projects, collaborating with cross-functional teams, and enhancing process efficiency.

EXPERIENCE

*Groupe Valeor, **Data & Ai Engineer***

May 2025 - Present

Led data migration from Openfire to Business Central, ensuring seamless transition and data integrity.

Managed ETL processes, maintaining and upgrading data pipelines using Snowflake, dbt, and Fivetran, improving data flow efficiency.

Collaborated with cross-functional teams to troubleshoot and resolve issues, enhancing overall project outcomes and system performance.

*01Edu, **AI Engineer***

Apr 2025 - Present

Developed and maintained AI projects, enhancing project outcomes by collaborating with cross-functional teams to create innovative solutions and resolve issues, resulting in an 80% improvement in project efficiency.

Created AI courses, improving learning outcomes and contributing to the overall success of the educational program of 01Edu, increasing student engagement.

Developed a one-week Python program for AI, created 10 math projects for AI learning, and implemented 5-6 projects for a new JavaScript AI branch, ensuring timely delivery and high-quality content.

*OCP 1337 Ai R&D lab, **AI Engineer***

Jun 2024 - Apr 2025

Led and maintained multiple AI projects, collaborating with cross-functional teams to develop innovative solutions, troubleshoot issues, and enhance project outcomes.

Spearheaded the CoreStream project, a scalable streaming platform supporting RTSP, HTTP, and various camera protocols with interchangeable deep learning models.

Led the EpiVision project, an AI-powered safety system detecting HSE violations (e.g., missing helmets, vests, and restricted zone breaches) and triggering automated alerts via email or access control restrictions.

Worked on the ConveyorVision & RockVision project, automating anomaly detection in conveyor belts and sieves at OCP to optimize maintenance and streamline data collection.

Responsible for deploying deep learning and machine learning models using NVIDIA Triton Inference Server, ensuring high-performance AI inference in lab environments.

*Ministry of Interior, **Business Intelligence Intern***

Mar 2022 - Jul 2022

Developed a Decision Support Information System for Human Resources Management, enhancing decision-making and prediction for improved performance.

Implemented advanced features to streamline HR processes, reducing decision-making time.

Collaborated with cross-functional teams to ensure system alignment with organizational goals, improving overall HR efficiency.

*The National Office for the sanitary safety of food products, **Software Engineer Intern***

Apr 2021 - Jul 2021

Enhanced decision-making by implementing advanced features for intuitive purchase order initiation, tracking, and finalization within the desktop and web application.

Streamlined purchase order processes, improving efficiency and accuracy, leading to a 80% reduction in processing time.

Collaborated with cross-functional teams to ensure seamless integration of new features, enhancing overall system performance and user satisfaction, increasing user satisfaction rates.

*Upwork, **Back End Developer***

Aug 2020 - Jul 2021

Specialized in Python and C# programming, delivering tailored solutions to clients, enhancing project outcomes.

Developed and maintained multiple applications, ensuring high-quality code and timely delivery, contributing to client satisfaction.

Collaborated with clients to understand their needs, providing strategic technical advice and innovative solutions, improving project efficiency.

EDUCATION

1337 School, Mohammed VI Polytechnic University

IT Architect • Oct 2022 - Present

Immersed in a rigorous IT Architect program at 1337 part of 42 network, specializing in C/C++ programming and software development. Proficient in crafting solutions with classic algorithms, adept at navigating file system intricacies, and skilled in UNIX process management. Acquiring expertise in Python for automation, data manipulation, web development using Django framework, and Artificial Intelligence applications.

Superior school of technology

Bachelor in Business Intelligence • Oct 2021 - Jul 2022

Focused on acquiring skills in data analysis, visualization, and database management, this program equipped me with the expertise to transform raw data into actionable insights. This degree has primed me to contribute effectively to data-driven decision-making processes in various professional settings.

Complex for training in the fields of new information technologies, outsourcing, and electronics

Specialized technician in software development • Sep 2019 - Jul 2021

I learned SQL database management with SQL Server and gained proficiency in developing desktop and web applications using .NET framework.

Groupe Riad

*Baccalaureate diploma (french option) • **physical sciences** • Sep 2018 - Jul 2019*

Focused on comprehensive study in physics, chemistry, and mathematics, this program provided me with a strong foundation in the natural sciences

LICENSES & CERTIFICATIONS

AI Fundamentals

DataCamp • AIF0025133328239 • Issued May 2024

Artificial Intelligence: CodinGame Certification

Codingame • 10144234 • Issued Nov 2023

Python3: CodinGame Certification

Codingame • 10062604 • Issued Dec 2022

Data Science Orientation

IBM • 64165a77-93f3-4dc2-8804-cf622d7b3177 • Issued Nov 2023

SKILLS

Python • C • C++ • FastApi • Feature Engineering • API Development • Algorithm Development • Data Engineering • Computer Vision • Generative AI
