

## EL FAIZ AMINE

### Senior Data Scientist

#### PERSONAL DATA

+2127 07 77 30 14

Lissasfa Lot Habiba N 55,  
Casablanca

ae.aminelfaiz@gmail.com

#### KNOWLEDGE

- Machine Learning : Supervised & Unsupervised Learning
- Data Cleaning & Visualisation
- Deep Learning
- Probability & Statistics
- Operational Research & Optimisation Techniques
- Mathematical Modelling
- Project Management

#### COMPUTER SKILLS

- Python / R
- Keras / Scikit-Learn / Pandas
- SQL / MySQL / PostgreSQL
- Git / Django / Docker

#### LANGUAGES

- English                      Fluent
- French                        Fluent

#### CERTIFICATION

- Deep Learning Specialization  
deeplearning.ai, 2020

#### FORMATION

ECOLE MOHAMMADIA D'INGENIEURS – 2015/2018

Engineer's Degree – Industrial Engineering

CPGE MOHAMMED V – 2013/2015

Preparatory Classes – MP (Rank 409/3303)

LYCEE OMAR BNOU LAASS – 2013

Bachelor of Science (Mathematics)

#### EXPERIENCE PROFESSIONNELLE

**Senior Data Scientist | TOPTAL ( FREELANCING PLATFORM ) | *Since March 2022***

**Senior Data Scientist | FORBES ( MEDIA & INTERNET ) | *April 2022 – January 2023***

- Developed Machine Learning models that predict the churn of Forbes subscribers using subscription data (start date, price, country, device, ...) and website visits data (date and time of the session, duration, path, category, ...).
- Developed Machine Learning models that predict future ad revenue generated from publishing articles on the Forbes website.

**Data Scientist | INWI ( TELECOM ) | *September 2021 – March 2022***

- Churn prediction of prepaid clients using predictive algorithms trained on historical data ( Recharge, internet consumption, Calls in, Calls out, ...)

**Data Scientist | Payment Center Africa ( BANK ) | *November 2018 - September 2021***

- Development of a Chatbot using Deep Learning models (**LSTM, 1D CNN**) and text processing techniques (**NLP, Word Embeddings, ...**) for the Banque Populaire Group. The Chatbot can answer customers questions that are related to mortgages and simulate the amount paid each month by customers wanting to have a mortgage.
- Optical Character Recognition using Deep Learning models (**RCNN, EAST, Tesseract**) to extract text from the Moroccan ID Card image (First Name, Last Name, Date of birth, Address,...). Verification of customers signatures and the readability of certain documents to digitize the process of opening bank accounts.
- Prediction of potential clients needing loans in the future using machine learning models (**RF, XGBoost, ...**) and by analysing clients characteristics and behavior in the past. Deployment of the solution using **Docker** and interfacing it to different applications bricks (CRM, Mobile Application,...) for business exploitation. Automatizing the process of scoring clients.

**Data Scientist Intern | OCP SA | *Février – Juin 2018***

- Development of Deep Learning models to digitize the maintenance process in Beni Amir factory. The purpose of the predictive models is to predict the remaining useful lifetime of the plant critical equipments by analyzing sensors data measuring temperature, pressure, and vibration.
