Working Experience

Sep,2022
-Currently

Senior AWS Data Engineer

DevoTeam /Morocco-France

In This project I am working as contract with Company to deliver a solutions in AWS cloud.

- Set up pipelines
- Set up road-Map of the entire project
- Manage project based on Scrum Methodology
- Set up IaC.
- Set up IaaS.
- Working with AWS services.

April,2022
-Sep,2022

Sr. Consultant Data Engineer

IBM & BP/Morocco-UK

- Developing and writing automation script for building Data Lake/ Data flow
- Developing a Templates in CloudFormation and Execute in CI/CD pipeline.
- Developing Data Infrastructure in AWS.
- Developing Dashboards in AWS siteWise.
- Developing ETL process with Amazon Kinesis Data Firehose.
- Generating SQL queries by using Amazon Kinesis Data Analytics.
- Connecting the AWS IoT Core with Lambda functions.

Aug,2021
-Currently

Sr. AWS consultant Data Analyst

CloudLink-Amazon /USA

- Developing and writing script for building Data Analysis pipeline by using AWS Code Deploy.
- Automating and provisionning the process by CloudFormation.
- Set up a MSK cluster.
- Developing a solution for fraud detection system.
- Applying KYC process.
- Developing solutions in AWS by using services like Quick-Sight, Athena, Glue...
- Developing Visualization dashboards.

Educa- Machine Learning, Deep Learning, tion financial Robotics

Dec,2021
–current

Founder of Metaverse SARL

Morocco

This company is a consulting firm that provide AWS cloud, Google cloud and IBM cloud services. Also, developing virtual reality solutions.

March,2021
–Aug,2021

Freelance | AWS Data Engineer

upwork/USA

I worked on cloud application designs, cloud approval plans, and systems to manage the cloud storage and also create and elaborate cloud computing system. through this exprience I had experience to put into practice:

- Creation a well-informed cloud strategy and manage the adaption process..
- Evaluation of a cloud applications and the infrastructure of softwares.
- Develop and organize cloud systems which involve from my side to work closely with IT security to monitor the client's cloud privacy.
- Find out the solutions of the technical issues in a professional and timely manner.
- Migration from On-premise infrastructure of cloud infrastructure.
- Identify the optimized cloud architecture solutions to successfully meet the strategic needs of the business requirements.

Mars,2021 –
July, 2021

Professor/ researcher

UH1 /Morocco

Teaching the courses and practical work in databases, programming in C, C + +, Java, JEE. Supervising graduation projects or academic projects.

Aug,2020 –
March,2021

Consultant Data Scientist

D-Aim/France

Analysing Data, Automate the audit process, detection of frauds, Make a prediction of target values based on supervised and unsupervised learning.

Feb,2019 –
Aug,2020

Data Engineer

Ashareah/USA

Analysing Data, Automate the testing by using AWS cloudformation templates, detection of frauds by using AWS forecast, Make a prediction of target values based on supervised and unsupervised learning.

Jun,2018 –
Feb,2019

Data Scientist

Orange/Morocco-France

Set up a KYC process for analysing telecommunication data and predict corresponding time periods for promotions, by LSTM/RNN algorithms.

Jan,2018 –
Jun,2018

Data Scientist

Ribatis/Morocco

Set up a platform for analysing text data and predict corresponding remarks, by using NLP and RNN algorithms.

Jun,2017 –
Jan,2018

Data Scientist

Nata.House/Brazil

Set up a platform for analysing employers efficiency through the realized scores of the company and also predict the future income for the company, by using SARIMA Model and Jira software cloud API.

Educa- Machine Learning, Deep Learning, tion financial Robotics

Education

2020 – Current	PhD. Mathematics and Computer science Morocco & Germany Focus: Elaborate a Enterprise solutions to stock market analysis and control of the volatility and deployment of the solution inside Azure Kubernetes Service throught Docker Image.
2017 – 2020	Engineering Studies Maths and Computer Sciences FSTM/Morocco Focus: Advanced statistics and Programming cloud solutions that can help to apply data analyzing process for the government. Engineer Theses Faculty of Sciences and Technologies/Morocco Setting up a system in government platform for analysing text and image documents in order to predict the decision of the decision-making board.
2014 – 2017	Bachelor Studies Maths and applications University Ibn zohr/Morocco Focus: Advanced Mathematics tools applied for reinforce and excel on optimization and probability Bachelor Theses University Ibn zohr/Morocco Establish a method for detecting molecule of gaze in space based on probability and Fourier function for minimizing the cost of energy consume from air condition, by making suitable shape of the air outlet.

Educa- Machine Learning, Deep Learning,
tion financial Robotics

Practical Experience during studies

2019	Data Analysis	Faculty of Sciences and Technologies/Morocco
	Create an automated SARIMA model in the R language, for analysing a market fluctuation, and predict the future volatility in order to adapt sells strategies to the expected volatility.	
2018	Data Engineering	Faculty of Sciences and Technologies/Morocco
	Establishment of a dynamic data bases on Cloudera framework by using java within virtual machine.	
2017	R & D	Faculty of Sciences and Technologies/Morocco
	Create a desktop application that analysis company data in order to extract a special KPIs to measure the performance of the employees.	

Supervision of students at graduate level

2021 – current	Reinforcement learning for financial portfolio management	University Ibn Zohr/Morocco
	Establish an integrated auto-agent inside of the stock market system based on a Deep reinforcement learning algorithm in order to take a right decision within managing a portfolio.	
2021 – current	hybrid CNN-Mesh technique for image classification	Faculty of Sciences and Technologies/Morocco
	Create a mobile application in aim to recognize and classify images by using an artificial neural network technique called CNN with finite element method.	
2021 – 2021	Optimize turbulence of fluid inside a limited shape by resolving Navier-Stokes equation	University Ibn Zohr/Morocco
	Solving the Navier-Stokes equations and changing the hyper parameters of Neural Network for optimizing the value of vorticity.	
2019 – 2020	Minimize energy costs	Faculty of Sciences and Technologies/Morocco
	Create a platform for measure the energy inside an institution and predict all charge comes with. And predict appropriate politic in term of minimize the cost of energy.	
2019 – 2020	Corona and economic impact	Faculty of Sciences and Technologies/Morocco
	In-depth studies on the impact of corona on Morocco's economy and try to find appropriate strategy or politic for minimize the economy damage based on Machine Learning algorithms.

Professional Projects / responsibilities

2021 – current	Development and set up BPaaS, SaaS, IaaS and CaaS Establishment of a Solution as software as service with open source language(python) and deployment in AWS cloud.	USA-Morocco
2021 – current	Deployment and integration of a customise protocol protocol Integration of an encryption protocol system for progressive web application deployed in cloud.	USA-Morocco
2021 – current	Deployment and execution of Norm ISO27001/Iso 9001 Deployment of the international norm for maintain good business as a vendor to our clients in term of security, communication and establishment of a good documentation management system.	USA-Morocco
2021 – current	Deployment and execution of Agile framework In order to run up a good business, I tried with me team to change the development work and the framework to Agile framework by deploy Scrum method and use Atlassian products (Jira, Confluence, bitbucket.	USA-Morocco
2021 – current	Negotiation and create POCs for clients One of my missions is to show up the Enterprise's competencies for the client and showcase the expertise of the team and also create a small POC of the solution in order to help the client to understand the strategy of work.	USA-Morocco
2021 – current	Development of Hr application/Accounting Application We launched an administrative Hr application that helps to manage all hr operations under international standards/norms.	USA-Morocco

Publications & workshops

Publications

2021 – current	Journal Paper Title : stock volatility prediction based on neural language processing.
2021	Journal Paper <i>Intelligent Systems in Accounting, Finance and Management</i> Title : The Prediction of S&P 500 and China A 50 futures with deep learning algorithms.
2021	Journal Paper <i>Current In publication</i> Title : Classification of EEG signals with a novel combination process based on REFCV and upgrade RAD Method.
2021	Conference Paper <i>3rd IEEE Middle East & North Africa communications Conference</i> Title : Classification EEG signals by using GA-BPANN.
2021	Conference Paper <i>International Congress & Complex systems and Artificial Intelligence (COSAI)</i> Title : Diseases Identification Based on shape features and Alexnet Model.
2021	Conference Paper <i>International Congress & Complex systems and Artificial Intelligence (COSAI)</i> Title : Enhancing The Prediction Of Credit Risk With Data Transformation.

Educa- Machine Learning, Deep Learning,
tion financial Robotics

Workshops

2021

Workshop of Natural Language Processing NLP

International Computer Science Days/Morocco

Using python to create a middleware that can scrape data from the web and analyze it for predefined specific needs by the user.

2021

Workshop of Data analysis of an index portfolio

The First International Computer Science Days/Morocco

Understand the mechanism of the stock market and how we can implement a deep learning model on the python to analyze and predict the future adjusted prices.

Certifications

Technical

2021

AWS Solution Architect Certification

focus on the core AWS services, such as (IAM), Virtual Private Cloud (VPC), S3, and EC2. This allow to have a good AWS approaches security, networking, data storage, and compute capability.

2020

Specialisation Finance and Quantitative Modeling for Analysts

Understanding of financial statement data and non-financial metrics that can be linked to financial performance, to a deeper dive into business and financial modeling

2020

Improving Deep Neural Networks: Hyperparameter tuning, Regularization and Optimization

Understand industry best-practices for building deep learning applications.

2020

Applied Text Mining in Python

University of Michigan and offered through Coursera

Understanding the manipulation of text data with python and how to extract information from it.

2019

Neural Networks and Deep Learning

deeplearning.ai and offered through Coursera

Understanding Deep Learning and all categories of algorithms that we can use in different context.

2019

Deep Learning with TensorFlow

IBM Developer Skills Network

Understand the usefulness of Tensorflow and how we can apply a deep learning algorithms with it.

2019

Machine Learning with Python

IBM Developer Skills Network

Understand How to implement Machine Learning Models and apply it as data scientist.

Research & Redaction

2021

EndNote online webinar

Clarivate Analytics Company (web of science)

Understand to use EndNote.

2021

Incites webinar

Clarivate Analytics Company (web of science)

Understand to use Incites.

2021

Manuscript Preparation webinar

Clarivate Analytics Company (web of science)

Understand to prepare the redaction of the scientific paper.

2021

Journal Selection webinar

Clarivate Analytics Company (web of science)

Understand how we can select the right Journal for our paper.
