 Rabat, Rabat-Salé-Zemmour-Zaër, Morocco

WORK EXPERIENCE

January 2020 Present	Consultant Data Engineer, CDG CAPITAL, Rabat, Morocco > Benchmarking Big data technologies, Cloudera, MapR, HDP. > Proof-of-Concept Cloudera. > Establishing a Datalake with Objects Storage, Airflow, hive, presto and kubernetes. > Digitization of data acquisition processes. > Designing pipelines that process a large dataset in order to extract the most significant information. > Implementation of data quality strategies. > Development of dashboards that bring important indicators together. > Construction of APIs rest for data consumption. > CI/CD pipeline design using jenkins, argoCD, github, vault, kubernetes ElasticSearch Hive Airflow Presto Spark Superset Boto3 FastApi jenkins argoCD Kubernetes TensorFlow BeautifulSoup Selenium Python
December 2018 December 2019	Junior Researcher in Data Science, MAScIR, Rabat, Morocco > Development of Road Traffic Accident Prediction Algorithms by DATAMINING : + Define use cases and propose study approaches adapted to the context. + Analyze and report road traffic accident data. + Implementation of machine learning algorithms besides conducting analysis using time series. + Studying the impact of road conditions on the prediction of road accidents' number using eXplainable AI (XAI). Python Keras XGBOOST Scikit-Learn CatBoost LightGbm StatsModels
November 2018 September 2018	Junior Data Scientist, MOSAICLAB, Casablanca, Morocco > Detection the textual components in image. > The recognition of characters from these components labelImg Python Tensorflow OpenCV Scikit-Learn
July 2018 February 2018	Research Intern Master Thesis, ADMIR RESEARCH LABORATORY ENSIAS, Rabat, Morocco > Propose a novel method based on Deep Learning to estimate the joint points of the hand in 3D space. Python Tensorflow OpenCV Scikit-Learn

SKILLS

Big data	Theoretical and practical skills on the Hadoop Ecosystem and cloud computing , NoSQL database (Cassandra, MongoDB and ElasticSearch) and RDBMS(Postgres, RDS ...), ETL construction and Streaming Data (using Kafka, Airflow, Spark, Hive and Presto) and dashboard creation (using Superset).
Programming backend	Python, Scala and SQL.
DevOps	Docker, kubernetes, Jenkins, ArgoCD.
Machine Learning	Algorithms and applied statistics, implementation of various techniques from scratch or with libraries (StatsModels, Scikit-Learn) in Python .
Deep Learning and Computer Vision	Programming experiences with frameworks like OpenCV for image pre-processing and Deep Learning framework like pytorch, Keras and Tensorflow on Python .
Text mining	Scrapping web data using Selenium and BeautifulSoup , tokenization, stemming lemmatization and Embedding textual data with NLTK and Gensim frameworks on Python

EDUCATION

June - 2018	Master of Research, Data Science and Big Data National Advanced School of Computer Science and Systems Analysis - Rabat, Morocco.
June - 2016	Bachelor of Science, Software Engineering. Faculty of Science and Technology, University moulay ismail - Er-rachidia, Morocco.

CERTIFICATION

ASTRONOMER CERTIFICATION FOR APACHE AIRFLOW FUNDAMENTALS

2021

 credential

AWS CERTIFIED DATA ANALYTICS

IN PROGRESS
