Full Stack Developer | Cloud & Backend Specialist | API Product Owner

Resourceful and results-driven full stack developer with over 5 years of professional experience building and maintaining scalable applications. Strong expertise in backend systems, cloud infrastructure (AWS). Proven track record in delivering high-impact projects within international, cross-functional, and agile environments. Strong communicator with critical thinking, stakeholder engagement, and continuous learning as core strengths.

WORK EXPERIENCES

Full Stack Developer & API Product Owner - Agflow, Geneva Switzerland

January 2020 – July 2025

- Spearheaded the full life cycle development of the company's core APIs used to sell raw market data, including architecture, implementation, documentation, and integration support. Maintained direct communication with clients and sales teams to ensure alignment with user needs.
- Designed and implemented backend endpoints with their unitests and access control for the client-facing data visualization platform. Helped scale from MVP to production.
- Oversaw and contributed to the development and refinement of document parsers — both rule-based and ML-assisted (e.g. using Claude Sonnet 3.5) — to extract structured data from diverse industry reports.
- Acted as API product owner: handled client onboarding, held solutioning calls, designed custom APIs, and provided ongoing support and troubleshooting.
- Collaborated with the sales team to craft API documentation and access demos used during pre-sales engagements and client onboarding.
- Led databases migration projects — planning, stakeholder coordination, and technical execution — ensuring a smooth transition with zero downtime.
- Managed the team's agile delivery pipeline: collected business requirements, created and prioritized tickets, distributed tasks, and ensured timely delivery across development and data teams.
- Automated workflows using AWS services (Lambda, Schedulers, API Gateway) for data exports and notifications.
- Set up Grafana dashboards for real-time monitoring of data pipelines and API performance, enabling proactive issue detection and improved system reliability.
- Conducted interviews for technical hiring processes to assess potential developers.
- Played a key role in securing and executing a 6-figure contract with a global financial data provider.

Tech stack: AWS, Python, Golang, PostgreSQL, DynamoDB, OpenSearch, Grafana, Claude Sonnet, Docker, GitHub, Notion, HubSpot

Full Stack Developer Intern – Gaea21, Geneva Switzerland

November 2018 – October 2019

- Developed two major eco-sustainability platforms: “Répertoire Vert” and “SLP”.
- Refactored and optimized MySQL database schema and fixed legacy code logic.
- Designed and implemented user/admin interfaces with improved usability and performance.
- Built and tested full-stack features from concept to deployment.
- Contributed to product ideation through team brainstorming, research, and functional documentation.

Tech stack: PHP (Symfony 3.4), JavaScript, jQuery, HTML/CSS/SASS, MySQL, Bootstrap, GitLab

IT Project Intern – MIT, Marrakech Morocco

April 2016 – July 2016

- Collected business needs for a dental office and built the first prototype of a management system.
- Designed architecture and implemented core modules using Symfony and MySQL.

Tech stack: PHP (Symfony 2.7), MySQL, HTML/CSS/JS, PHPUnit, GitHub, Scrum

EDUCATION

Master in Information Systems — HEC UNIL, Lausanne Switzerland, February 2020

Grade: 5/6 — 102/90 credits

- Thesis: Agile & Remote Cross-Functional Work in Software Development
- UX Project: Built a mobile app prototype to optimize in-store navigation (Proto.io)
- Management: Risk analysis of Poya Bridge construction in Fribourg (PMI, Gantt)

Pre-Master in Management — HEC UNIL, Lausanne Switzerland, June 2017

Bachelor in Information Systems — FSTG Cadi Ayyad University Marrakech, June 2016

SKILLS

Cloud & Infrastructure: AWS (Lambdas, RDS, DynamoDB, API Gateway, SAM)

Backend: Python (pytest), Golang, PHP, PL/SQL, Java, C

Frontend: JavaScript, HTML, CSS, Bootstrap, jQuery, SASS

Databases: PostgreSQL, MySQL, Oracle

Tools: Docker, Git, GitHub/GitLab, Grafana, Hubspot, Notion

Frameworks: Symfony 3 (PHP), Java EE

Project & UX: Agile, UX/UI Design, proto.io

CRM/ERP: Salesforce, ActiveCampaign, Odoo, Magento

Methodologies: UML, MVC, Merise, User Stories

LANGUAGES

 **Arabic :** Native

 **French :** Fluent

 **English :** Fluent

 **German :** A1
