SUMMARY

Passionate and innovative Machine Learning Engineer and Data Scientist with 5 years of experience in software engineering, machine learning, computer vision, and deep learning. Skilled in developing, maintaining, and optimizing data pipelines using a variety of tools and frameworks. Seeking a challenging role as a Senior Data Engineer to leverage my expertise in data engineering and machine learning in a dynamic environment.

EDUCATION

MSc	Graduating Oct 2021
VI Polytechnic University	N/A
Data Science and Industrial Management	
Relevant coursework: Business Administration	Undergraduate studies
IPGEI Preparatory Classes	Graduating Jan 2017
Engineering	N/A
Relevant coursework: Advanced Mathematics	

TECHNICAL SKILLS

Programming Languages, Python OpenCV C++ Flutter JS
Data Processing and Databases, SQL MongoDB Elasticsearch
Machine Learning Frameworks, Scikit-learn TensorFlow
DevOps, Docker Kubernetes
Web Development, FastAPI Flask Django HTML/CSS/JavaScript
Mobile Development, Flutter React Native
Data Visualization, Superset Matplotlib
Version Control, Git
Other, Excel

EXPERIENCE

DrishtiPoint, USA: AI and Tech Consultant	June 2022 – Present
- Led the tech team to develop a 3D customization leather handbags e-commerce platform. - Improved the platform's efficiency and user experience using advanced data analysis techniques. - Streamlined data processing and analysis pipelines using Python, Elasticsearch, and PySpark.	
XTRAC, Morocco: CTO Deep Learning Engineer	Jan 2021 – Oct 2021
- Led the development of a SaaS product utilizing YOLO and Object Tracking algorithms for monitoring in-store shoppers and generating insights on their behavior. - Orchestrated data pipelines using PySpark and MongoDB to collect, process, and store large-scale video data.	
BLEUDOVE Morocco, Morocco: Deep Learning Engineer	Feb 2020 – Apr 2021
- Collaborated in the development of a SaaS product for monitoring queues in physical spaces using computer vision and deep learning techniques such as face detection and pose estimation. - Optimized data processing pipelines using Python and Elasticsearch to handle real-time video streams and provide analytics.	
MARSETNE Mauritania, Mauritania: CTO Python Developer	Mar 2018 – Mar 2019
- Managed the development of an e-commerce marketplace platform, overseeing a team of engineers and ensuring quality standards. - Built efficient data processing pipelines using SQL and Hive to handle large-scale transactional data and provide business intelligence.	
Freelance Worldwide, Worldwide: Python Engineer	Jan 2017 – Present

- Assisted multiple businesses in developing MVPs and SaaS products, incorporating advanced machine learning/deep learning algorithms such as natural language processing, image classification, and object detection.
- Streamlined data processing and analysis pipelines using Python, PySpark, and Elasticsearch to handle various types of data sources and formats.

PROJECTS

Leather Handbags 3D Customization E-commerce Platform

Developing a platform for Zellihandbags USA to allow customers to customize and purchase handbags in 3D.

- Led a cross-functional team to implement the project, ensuring smooth communication between different stakeholders.
- Conducted extensive data analysis to refine the 3D customization process, resulting in a significant improvement in the user experience.

Self driving car Model

N/A

Developed a self-driving car model using computer vision and deep learning techniques.

- Implemented 3D and 2D object detection algorithms to identify and track obstacles, lanes, and traffic signs.
- Conducted research on the state-of-the-art methods and best practices for autonomous driving.
- Skills: Python, OpenCV, TensorFlow, PyTorch, Keras, YOLO, Computer Vision, Deep Learning, Research.

Fishing industry Fibers detection and measurement

N/A

Designed and built a system to detect and measure fishing industry fibers using computer vision and machine learning algorithms.

- Applied image processing techniques such as edge detection, segmentation, and feature extraction to identify the fibers and their properties.
- Skills: Python, OpenCV, Scikit-learn, Image Processing, Machine Learning.
- title=Fishing industry Fibers detection and measurement, duration=, keyHighlight=Designed and built a system to detect and measure fishing industry fibers using computer vision and machine learning algorithms.]
- Applied image processing techniques such as edge detection, segmentation, and feature extraction to identify the fibers and their properties.
- Skills: Python, OpenCV, Scikit-learn, Image Processing, Machine Learning.

Code Embeded search engine

Created a code embeded search engine based on deep learning models.

- Used natural language processing techniques such as word embeddings, semantic similarity, and query expansion to retrieve relevant code snippets from a large corpus of source code.
- Skills: Python, PyTorch, HuggingFace Transformers, Natural Language Processing, Deep Learning.

Audiobook Platform

Developed a comprehensive audiobook platform for iOS and Android devices using Django for API development.

- Conceptualized and implemented a user-friendly interface for seamless audiobook access and management.
- Integrated third-party APIs to provide a diverse range of audiobooks to users.

E-commerce Platform

Engineered an E-commerce web and mobile application with Python Django serving as the backend framework.

- Devised two distinct versions of the platform, catering to different user needs.
- Implemented secure payment gateways and managed user data efficiently.

Network and IT Freelance Platform

Built a robust freelance platform for networking and IT professionals using Flutter for frontend and Django for backend.

- Optimized the mobile application for both Android and iOS devices.
- Established a rating system to facilitate better client-freelancer relationships.
