

CV
EL AKROUDI ABDESSAMAD

Lsroudi@gmail.com

0629771034

Experience summary :

- First year as a PhD student: work on Decentralized identity, data trust regarding the blockchain (document, img, video) the language used is Rust and the Substrate framework for the needs of the POCs
- Big Data engineer, recent accomplishments include engineering, installing and supervising HDP clusters for Societe Generale, AXA, La Poste as well as expertly integrating Kafka clusters for Orange and IBM
- Solid grasp of distributed Hadoop architecture (Cloudera) and Kafka confluent
- Proven capacity to manage and direct material or hardware-related outage situations : impact analysis, root cause analysis, creation of preventative communication content
- Skilled in multi-language development (PHP/Java/ Shell / Python/SQL..) to meet project needs (automatization, dashboard, tools ..)

Professional experience :

:

DATAOPS: LA POSTE

March 2021

- Senior DevOps and Senior Data Architect
- Technical environment :
 - Hadoop stack HDP 2.X/3.X and CDP 7.X
- Services managed:
 - Ranger, Knox, NiFi, Kafka, Spark
- Securing the infra with Kerberos and FreeIPA
- Automation with Ansible, Deployment and configuration with Ansible (CDP 7.X and HDP/HDF) and Kerberos/SSL
- Tools: Jira, SVN, Gitlab

Big Data Architect : AXA

March 2020 to February 2021

AXA Data Lake migration to the Azure Cloud Azure :

- Participate in the development and drafting of architecture files for the migration project to Azure. Accompaniment of teams in the development of solutions.

- Deployment of Ansible roles for the needs of the project
- Securing the Kafka cluster
- Resolution of P1 or P2 type incidents (Cloudera, CDH).

Big Data Architect : Societe Generale

March 2019 to February 2020

- Supervised several HDP clusters in production (maintenance, capacity upgrade, organization of production operations, management of level 3 incidents)
- Monitored Kafka cluster via JMX, InfluxDb and Grafana
- Installed SSL certificates (Kafka)
- Actively participated in maintenance of several HDP clusters / Kafka
- Automated administration actions of production clusters, with the development of Ansible roles (creations of user environments, keytabs, Ranger KMS encryption keys...)
- Integrated solid security practices

Kafka Expert : BNPP / IBM

August 2018 to February 2019

- Contributed to different studies, architecture, audit and resilience strategy as well as targeted solutions - team based and in collaboration with confluent provider
- Edited engineering and technical documents (interface contract, procedures, IT-rules ...)
- Integrated an Audit (benchmark) strategy and performance strategy
- Participated in IAC offer by integrating Ansible roles (component installation, resilience test, capacity upgrade test)
- Assured exploitation, evolution and realization of business projects in Argile and IAC mode
- Led dev and ops teams in Kafka utilization
- Treated level 3 on-call tickets and resolved incidents in order to re-establish Kafka service
- Developed and integrated custom monitoring system (Java/JMX)

Big Data Architect : Orange

July 2017 to July 2018

- Installed and supervised 7-node Kafka cluster (maintenance, capacity upgrade, organization of operations in productions, management of level 3 incidents)
- Monitored Kafka cluster via JMX, InfluxDb and Grafana
- Installed SSL certificates (Kafka)
- Actively participated in maintenance of Hadoop cluster of 90 nodes in production, 12- node cluster for tests
- Responsible for hardware updates
- Added nodes
- Responsible for troubleshooting and support to applications deployed on clusters
- Created tickets (Cloudera support)
- Created UDF Hive
- CI/CD with jenkins
- Responsible for automatization (Ansible, Python...)
- Prepared documentation

Big Data Administrator / Developer : SPINERGIE (startup)

October 2016 to June 2017

Integrate a distributed architecture to crawl a part of the web

- Integrated Hadoop cluster
- Integrated distributed crawler (Nutch)
- Optimized Nutch by developing Java plugins and integrating them into Nutch ecosystem
- Developed dashboard monitoring for Nutch (Shell, Symfony2, Python)
- Created metal index based on ElasticSearch / Lucène (Pandas, Python, Kibana)
- Responsible for text processing and text mining (Python, NLTK and Pandas...)
- Classified crawler documents using models of **Maching** learning (Scikit-learn, Pandas,...)
- Supervised platform and wrote shell scripts

Systems :

Unix /Linux, Java, Python, Javascript, php, Nutch, ElasticSearch, Kibana, Symfony2

Research and Development Engineer : Paragraph Research Laboratory

April 2016 to September 2016

Objectives:

- Acquire expertise in the research field
- Develop a prediction tool based on models of machine learning

Accomplishments:

- Implementation of an algorithm (SOM) able to predict the progression of Parkinson's disease using smartphone data (statistical approach combined with a model of non-supervised learning)

n / TensorFlow

Act for employment ('Act for employment')

ist 2014

- Created global architecture : frontend and backend of <http://www.agirpourlemploi.com>
- Conceived / coded system facilitating interprofessional contact
- Selected technologies used (Symfony 2/Doctrine/ Javascript/JQuery/Json...)
- Developed web services : Json,XML.....
- Accompanied / edited fellow developers' code
- Carried out unitary tests
- Provided training and accompaniment for collaborators
- Conceived / coded vertical crawler in Java (Multithreading / BFS algorithm)
- Studied and implemented algorithms (BFS,DFS,MinMax)
- Utilized git

PHP, Symfony2, Json, XML

ance

February 2010 – October 2011

.co.uk, London

- Redesign of several modules on back end of site <https://www.mobypark.com/fr>
- Best practice: Respect of programming principles SOLID
- Functional tests with Behat
- Utilization of git

Project 2 : FirstWeb, Toulouse

- Set up global architecture : frontend and backend of <http://www.andes.fr/>
- Conceived / coded intranet of <http://www.andes.fr/>
- Utilized Zend framework

ymfony2, ZendJson, XML

bunisys

- Web development PHP/MySQL
- Developed plugins for WordPress platform using PHP/MySql
- Utilized Zend Framework modules ex : Zend\Feed
- Administrated Linux + web servers + Apache

Systems: *Linux, PHP, ZendJson, XML*

TECHNICAL SKILLS

Big Data : Cloudera, Kafka

Languages : Java, Python, Scala, C, PHP, XML, JavaScript, Html5/Css Prolog, Caml R

Operating systems : Windows, Linux (Debian, Centos, ReadHat)

Frameworks : Zend, Symfony, JQuery, D3.js, Hadoop, HDFS, Spark, Solr, Java EE

IDEs : Netbeans Eclipse Emacs

Design patterns : MVC Factory Builder Adapter DAO

Methods : Merise, Uml, Scrum

ORMs : Doctrine

Databases : MySql, Sql Server, PostgreSQL, MongoDB, Hbase

PROFESSIONAL SKILLS

- Analysis of context and client needs
- Analysis, conception and realization of applications
- Writing of technical and functional documents
- Service-minded and team-oriented

EDUCATION AND TRAINING

Education :

2015-2017 Master 2 Mathematics, specialized in Big Data and data mining
Université Paris 8

2003-2007 System administrator and data network

Professional training and certifications :

2018 Kafka Operations / Confluent University (Zenika)

- Functioning of Kafka and Confluent as well as their principal subsystems
- Functionalities and their interactions
- Set up, administration and configuration of Kafka clusters

2017 Hadoop Administrators of Cloudera with Xebia

- Fluency in Hadoop and HDFS environment
- Hadoop Cluster : choice of material, « configuring nodes »
- Configuration, implementation and management of clusters : use of "Cloudera Manager for Easy Installation", "Configuration Management Tools"
- Adding and removing « Cluster Nodes », cluster rebalancing and optimization
- Task management : "FIFO Scheduler", "FairScheduler"
- Management of Hadoop "Log files"
- Utilization of "NameNode" and "Job Tracker Web UI"
- Troubleshooting
- Cluster « Benchmarking »
