EDUCATION

- 2023- 2025 Master's Degree in Management Sciences
FSJES Agdal, Université Mohammed V, Rabat
- 2022- 2023 Professional Bachelor's in Banking & Financial Management
École Supérieure de Technologie, Essaouira
- 2020 - 2022 DUT in Finance, Banking & Insurance
École Supérieure de Technologie, Meknès

Professional Experiences

ABL Corporation , Casablanca
Nov 2025-Feb 2026

Cash Flow Management & Forecasting:

- Performed weekly cash flow forecasting and liquidity monitoring across 4 entities, ensuring real time visibility on treasury positions
- Built automated Excel models integrating bank statements and accounts payable data to streamline multi entity consolidation
- **Result:** Reduced manual processing time by approximately 40% and improved forecast accuracy

Management Control & Cost Analysis:

- Developed multiversioned Power BI dashboards analyzing direct and indirect costs by product line, restructuring legacy unstructured data into a comprehensive management control system.
- **Result:** Dashboards used daily in cross functional meetings, enabling accounting to control budgets and expenses, commercial managers to optimize margins and pricing strategies, and the CFO to drive strategic performance management. Adopted by 3 departments serving over 10 users.
- **Impact:** Directly supported management decisions to reinforce profitability and reduce operating costs.

Accounts Payable & Accounts Receivable:

- Processed invoices, scheduled payments, and tracked collections across multiple entities.
- Performed vendor and customer account reconciliations, ensuring accurate financial records and strong stakeholder relationships.

Bank Al Karam, Casablanca

ERP Accounting Adaptation Project.

Sep 2025-nov 2025

- Contributed to ERP system adaptation for bank supplier accounting to meet regulatory compliance requirements.
- Assisted in testing and validation of accounting modules ensuring data consistency with internal financial reporting standards.

Bank Al Maghrib, Rabat

Treasury Department

Mar 2025 - Jun 2025

- Monitored treasury positions and liquidity movements to ensure effective cash flow management.
- Recorded and reconciled treasury operations with accuracy in the central bank's internal system.

Accor Group MGallery Le Medina, Essaouira

Financial Analysis & Control of management

Apr 2023 - Jun 2023

- Tracked key performance indicators: RevPAR, occupancy rates, operating margins, and financial performance analysis by department.
- Contributed to the preparation of financial performance reports

Marjane, Meknès

Financial Analysis & Commercial Performance

Apr 2022 - Jun 2022

- Conducted budget vs. actual variance analysis to identify discrepancies and their impact on profitability and cash flow.
- Evaluated profitability by department and product line, calculating key financial ratios such as gross margin, inventory turnover, and return on sales to support commercial decision making.

Academic & Professional Projects

Applied Research Project - Optimizing Insurance Claims Financial Reserves Using Neural Networks and AI

Research paper accepted for publication in a Scopus indexed journal.

Developed predictive models combining the Chain Ladder method with neural networks to optimize financial reserves, achieving a 74% reduction in MSE and improving Solvency Capital Requirement accuracy for Solvency II compliance and risk assessment.
