

SOUFIANE EO.

Senior Data Consultant | Data Project Manager

8 YEARS OF EXPERIENCE

RESUME

- As a **Senior Data Consultant and Data Project Manager** with 8 years of experience, I excel in designing and implementing cloud data warehouse solutions, particularly using **Azure Databricks and Snowflake**.
- I have a proven track record of delivering **end-to-end data engineering solutions**, from requirements gathering to deployment and user training.
- I'm adept at **building executive dashboards** and translating business needs into actionable metrics using Power BI.
- I've **successfully led data projects**, including pricing data initiatives with high-volume Delta Lake pipelines, and **managed teams of up to 8 members**.
- My expertise includes **data modeling, data quality monitoring, and project cost estimation**.
- I'm experienced in collaborating with stakeholders to align **data architecture with business strategy and establishing BI governance standards**.
- I hold **certifications in Databricks Data Engineering, Power BI Data Analysis, and SAFe Agile methodologies**.

Industry Expertise: Insurance (Industrielle Alliance), Retail (Carrefour, Aswak Assalam, Kitea), Pricing, Healthcare (Medtronic), Finance, Logistics, MarTech

Leadership & Project Management: Agile methodologies (SAFe, Scrum, Kanban), team leadership, stakeholder management.

Budgeting & Estimation: Cost modeling, resource planning, solution design for BI and AI projects

Professional Experience

Senior Data Consultant - Data Architect - Industrielle Alliance (IA) Sept 2025 - Present

Montreal, Canada / Casablanca, Morocco

- Designed the architecture of the enterprise data platform integrating **Azure Databricks and Snowflake** as the **cloud data warehouse layer**.
- Delivered **end-to-end data engineering solutions** including requirements gathering, modeling, development, deployment, and user training.
- Built **executive dashboards for COMEX**, finance, and home insurance.
- Led the development of **strategic Power BI dashboards** tracking business performance (KPIs, margins, profitability, forecasting).
- Translated **business requirements into actionable decision-making metrics** through Power BI.
- **Technical Environment:** ADF, Databricks, Snowflake, Power BI, Azure DevOps STRATEDGE | Client: Carrefour LabelVie / Atacadao (Retail)

Senior Data Consultant / Data Project Manager - STRATEDGE | Client: Dec 2024 - Sept 2025
Carrefour LabelVie / Atacadao (Retail)

Morocco

- Designed and deployed an **Azure/Databricks lakehouse architecture** integrating **critical retail domains**: pricing, inventory, logistics, and sales.
 - **Delivered end-to-end data engineering solutions** including requirements gathering, modeling, development, deployment, and user training.
 - **Implemented data quality monitoring dashboards** ensuring reliability and traceability.
 - **Led the Pricing Data Project with high-volume Delta Lake pipelines.**
 - **Managed a team of 8 members** (5 Data Engineers, 3 Data Analysts).
 - **Built pricing data models** (elasticity, thresholds, price sensitivity).
 - **Produced project cost estimations** (architecture, effort, budget).
 - Collaborated with **business and IT stakeholders** to align data architecture with the company's digital strategy.
 - **Technical Environment:** Azure Databricks, ADF, Delta Lake, ADLS, Azure DevOps, Power BI
-

Senior Data Consultant - STRATEDGE | Client: Docaposte – Medtronic International (Healthcare)

Apr 2024 - Nov 2024

Morocco – France (Remote)

- **Designed and implemented a Snowflake-based cloud data warehouse** to support global healthcare analytics and regulatory reporting.
- **Developed ELT pipelines feeding Snowflake** using Azure Data Factory and **Azure Databricks** to ingest and transform large-scale healthcare datasets.
- Built **executive dashboards** for logistics and executive **leadership**.
- Implemented scalable **semantic models**.
- Industrialized Power BI deployment: workspaces, pipelines, multi-environment deployment.
- **Established BI governance standards** (visualization guidelines, UX best practices, KPI catalog).
- **Led project framing workshops and project estimations** (planning, costs, technical roadmap).
- **Technical Environment:** ADF, Snowflake, ADLS, SQL Server, SSIS, SSAS, Power BI, Azure DevOps

Principal BI Consultant & Project Manager - Alexsys Solutions (Consulting Firm)

Nov 2020 - Apr 2024

Morocco

- Led **end-to-end data engineering and BI projects** from requirements gathering to deployment and training.
- **Designed data quality monitoring dashboards** to ensure reliability and consistency.
- **Implemented risk management** and project estimation practices.
- **Received the Client Relationship Excellence Award.**
- **Technical Environment:** ADF, Databricks, SQL Server, SSIS, SSAS, Power BI

BI Developer - Winfox Services (Finance)

May 2019 - Jul 2020

Morocco

- Developed automated financial reports and dashboards.
 - Coordinated with stakeholders to align BI solutions with business objectives.
 - **Technical Environment:** SQL Server, Power BI
-

Morocco

- Built Power BI dashboards for wealth management and finance.
- Migrated SSAS cubes and data warehouse architectures.
- Developed a data visualization application.
- **Technical Environment:** SQL Server, Power BI, Java / JEE

Education

Master's in Big Data & Artificial Intelligence

Université Hassan I, Settat

B.Sc. in Information Systems & Decision Engineering

Université Hassan I, Settat

TRAINING OR TEACHING EXPERIENCE

Databricks & Power BI Training

Trainer / Technical Instructor

Client : FORVIA HRO at Romania (Remote)

Technical Environment:

- Delivered a hands-on technical training program on Databricks and Power BI for the FORVIA HRO data team.
 - Trained 6 data engineers and 3 analysts on modern data platform concepts and analytics workflows.
 - Covered Databricks Lakehouse architecture, PySpark development, Delta Lake concepts, and data pipeline design.
 - Delivered Power BI workshops covering semantic modeling, DAX fundamentals, dashboard design, and performance optimization.
 - Included practical labs based on real datasets and business use cases from the client environment.
-

Snowflake Training Program

Trainer / Data Architect

Client : Industrielle Alliance (IA Financial Group) Location: Canada (Hybrid)

Technical Environment:

- *Designed and delivered a Snowflake technical training program for internal data engineers and analysts.*
 - *Trained 10+ team members on Snowflake architecture, data modeling, performance optimization, and ELT best practices.*
 - *Delivered hands-on sessions covering Snowflake SQL, data loading strategies, warehouse management, and governance features.*
 - *Provided practical workshops integrating Snowflake with Azure Databricks and Azure Data Factory.*
 - *Supported teams during the adoption phase of the Snowflake data warehouse within the enterprise data platform.*
-

Certifications

Databricks Data Engineer Associate

Microsoft Power BI Data Analyst Associate

SAFe 5.1 Agilist (Scaled Agile Framework)

CFA Private Equity Certificate

Skills

Cloud & Data Engineering:

Azure Data Factory, Databricks, Snowflake, ADLS, Delta Lake, Logic Apps, SSIS

Big Data Technologies & Programing:

SQL, T-SQL, Python, PySpark, DAX, ClickHouse,Apache Spark, Databricks, Delta Lake, Large-scale data processing, Distributed data architectures

Data Architecture:

Lakehouse design, SnowFlake,ETL/ELT pipelines, enterprise BI frameworks

Data Visualization:

Power BI, Cognos Analytics, Apache Superset
